

Position	Description	Part no.
1	CR123 Batteries (photo) 2pcs	CR123
2	Stainless steel conductor	BUL22-3
3	O-rings (sealing) 2pcs	OR203262
4	Turn stop O-ring (non-sealing O-ring) 1pcs	OR211262

Always make sure you have a thin layer of grease on the sealing O-rings.

Don't pull the conductor out if you don't have a good reason.
Just to look is not a valid cause and will wear the attachment hole.

Don't turn the bezel too hard, it will not shine brighter.
