

The Back Up Lights runs on 3 C / R14 cells batteries. We strongly recommend batteries from any of the well known manufacturer, like Energizer, Duracell and so on.

If You take care of Your back up light(s) where is really no life time limit.  
Here is a few advices:

Always keep both the o-rings lubricated.  
Now and then, take away the o-rings. Clean them. Clean the traces from old grease.  
Clean bezel's o-ring surface.  
Check the conductor for verdigris.

Put the batteries down with "+ nipple" first.

Make sure the conductor is in its trace.

Put on the bezel and make a function check.

Happy Diving
