

The Back Up Lights runs on 3 C / R14 cells batteries. We strongly recommend batteries from any of the well known manufacturers, like Energizer, Duracell and so on.

If You take care of Your back up light(s) where is really no life time limit.
Here is a few advices:

Always keep both the o-rings lubricated.

Now and then, take away the o-rings. Clean them. Clean the traces from old grease.
Clean bezel's o-ring surface.

Put the batteries with the "+ nipples" up towards the bezel.

Put on the bezel and make a function check.
